Recommendation letter

To whom it may concern.

This reference letter is in support of Antonia Meštrović job application.

We met Antonia during her involvement in a project she worked on as part of the DSD program at the Faculty of Electrical Engineering and Computing, where Visage Technologies was a sponsor. Following strong recommendations regarding her excellent organizational skills and high level of independence in frontend development, we invited Antonia to join one of the divisions at Visage Technologies to work on a new project that was still in its early stages.

Antonia joined Visage Technologies in February of 2025, as a student, in the position of web developer. She quickly integrated into the team and began to confirm the positive feedback we had received. She soon took over nearly the entire frontend development of the project and proactively suggested improvements to the initial concept, as well as ideas for new features.

After her first experience in the company, Antonia was recommended internally and continued working as a student in the beauty industry division of the company. After a quick ramp up in our infrastructure and system's architecture, she quickly started contributing to the development of our main products, doing the same kind of tasks as the rest of the team members, with limited supervision.

During this time, Antonia has shown good knowledge and resourcefulness, being able to finish her tasks on time and with the required quality with minimum guidance.

We were very pleased with Antonia's performance and would be glad to continue working with her if an opportunity arose where her expertise could be fully engaged in a long-term or full-time capacity. We believe she would be a strong asset to any organization which needs competences related to both front and back end web development, combined with positive energy and enthusiasm.

Should you need further information, please feel free to contact me by e-mail (barbara.kuzet@visagetechnologies.com), or by phone (+385 91 124 5663).

With best regards,
